Main Page:
- Users will be presented with a scrollable list of available accommodations.
- Each entry will provide basic information about the location such as its address, the number of rooms available, and the approximate capacity for evacuees that it can support.
- Admins will have three dots on the side of each entry. By clicking on these dots they will be presented with options to modify the entry.
- By clicking on the "Book Now" button users will be brought to the Reservation page.
- By clicking on the name of the location, users will be brought to a secondary page with a more detailed description of the location.

Individual Accommodations:
- Each individual accommodation will have a page with more detailed information about it. Users can see how many people are currently staying at the location and read a description with more specific details about the location.
- Clicking "Book Now" will take users to the Reservation page.
- There is a back button in the top left that will take users back to the main Accommodations page.
